TEACH FOR INDIA

2009 - 2021

ALUMNI IMPACT REPORT
Every year, reasons change, but the result remains the same. I religiously visit the Teach For India Institute annually. Simply because I have never experienced a happier place. I doubt one can possibly exist. It creates a surreal space enabling people, even the most guarded ones, to be vulnerable yet safe, encourages them to be silly without judgment and allows them to have inner conversation in peace despite the overdose of activities.

So when in 2016, I passed through one of the toughest phases of my life, bordering on a phase of constant melancholy, unexplained bitterness, and a lost sense of self-worth, I showed up at Institute for 10 days and I knew I was home. Spoke to none about my inner struggles, yet it was therapy.

This sense of community is rare. I’m sure I share this affinity with thousands though we may have experienced it differently.

It is perhaps our abiding love for our country, and its many children through whom we understand each other deeply even in our differences, or perhaps our shared pursuit of entrepreneurial search for meaning in life by means of service, or perhaps our common (and too many) struggles during our Fellowship, or perhaps just the fact that Teach For India attracts certain kinds of people.

The last ten years have given us much to celebrate: Our students have markedly higher levels of language proficiency, they are able to engage with problems critically, and their confidence levels are amazing. Our Alumni have embarked on journeys to solve some of the most complex problems our country has ever seen, while building a community of support for one another.

It is a remarkable feat by Teach For India to have mobilised and then retained more than three thousand (and counting) young, motivated people in the development sector while challenging and redefining the discourse on pedagogy and classroom management practices.

However, I must strike a note of caution. The ultimate barometer of our success lies in improving the lived realities of our children, and their families. Therefore, we must constantly pause and reflect to consciously ensure that there remains no difference between our own social mobility and that of the communities we seek to serve. The moment it begins to diverge or our own upward social mobility takes precedence, we have lost.

Who knew that a chance conversation back in 2011 where I first heard about Teach For India would bring me here. :) But then here we are,

Cheers,

ANURAG KUNDU
2013 Teach For India Fellow
Our Vision

ONE DAY ALL CHILDREN WILL ATTAIN AN EXCELLENT EDUCATION

Our Mission

TO BUILD A MOVEMENT OF LEADERS WHO WILL ELIMINATE EDUCATIONAL INEQUITY IN INDIA
Teach For India was founded with the recognition that the path to a better tomorrow demanded something radically different. It demanded leadership. People who not only understand India’s ground realities, but also have the commitment and gumption to change them.

Over the past twelve years, more than 120,000 young people have applied to Teach For India’s Fellowship Program. We have since infused the system with more than 3400 leaders – people who have honed the courage and skill to spend a lifetime serving the country’s most vulnerable children and families. It was a journey, for each of them, that began with two years in India’s most challenging – and most impoverished – classrooms. The four walls of their schools presented a microcosm into the issues vexing the country. And the children who stared back at them offered an opportunity to transform.

The Teach For India Alumni Impact Report, found in the pages that follow, offer a glimpse into the path-changing innovations, breakthroughs, and relentless efforts our Alumni are pioneering, every single day.

It tells us that, twelve years later, Teach For India Alumni are reaching more than 33 million children - that’s 1 in 10 children in India - at various levels of the system from schools, communities to governance and policy - level initiatives. More than 77% of our Alumni continue to serve in the social sector, a commitment that is fueled by belief: more than 90% of our Alumni are convinced that India’s children can receive an excellent education. It also tells us that our community has founded 150+ organizations.

In reading the report that follows, we hope you join us in finding room to pause, to celebrate what our community is capable of, and to hold the truth and the hope of our collective journey ahead.

Today, these 3400+ leaders are starting their very own schools. They’re running organizations. They’re training teachers. Designing policy. And continuing to serve within classrooms, non-profits, and corporate institutions. Most importantly, though, they’re working together to collectively build a better India.

Sandeep Rai
Chief of City Operations
As we look to the future, my dream for us is this: let’s keep the bar high. Let’s believe in the fullest potential of what education can unleash. Let’s fight with love, courageously, until every child, armed with that fullest potential of education, lives in a world free of poverty and filled with love.

LET’S DO THIS WITH OUR CHILDREN.

Shaheen Mistri, CEO & Founder, Teach For India
Our First Decade

1. Will the country’s most promising and passionate talent join the Teach For India Fellowship? 1

2. Can our Fellows, together with their Students, deliver an excellent education while simultaneously growing themselves into India’s future pipeline of leadership? 5

3. Will our Alumni garner the passion, commitment, and leadership skills needed to multiply their impact? 11

4. Will we come together, as a growing movement, to begin creating impact that is transformational and sustainable for impoverished children and communities? 40

5. Can we learn from – and spread – innovations rapidly so we serve not some, but all children? 42

The Next Decade 44

Appendix 49
Over the last 12 years, more than 120,000 young people and professionals have applied to the Teach For India Fellowship. Our cohort size has grown from just 87 Fellows in 2009 to 500 over the last 5 years. We’ve graduated more than 3,400 Alumni across our first 10 cohorts.

The belief in our model is also evident in the investment of our donors as our funding has grown 12-fold, in the commitment of our school and government partners as we’ve grown from 34 schools to 340, and in the belief of our parents and communities as we’ve grown from working with 2,700 to 32,000 Students.

Amidst these successes, however, emerged many challenges. Our cohort size plateaued at 500. We’ve realised those closest to inequity must also lead this movement. We’ve learned that we must rethink not only the size, but also the calibre of our future cohorts.

In answering this first question over the last decade, a new question has arisen:

What will it take to grow and strengthen our Fellowship in size, diversity, capability and commitment?

Will the country’s most promising and passionate talent join the Teach For India Fellowship?
“Teach For India is a bold vision backed by the courage and belief that change is possible.”
Ramesh Srinivasan, Senior Partner, McKinsey & Company

“This is not an organisation, it is a movement. When I look at the Fellows and Student Alumni, I feel optimistic about India.”
Anu Aga, Founder and Trustee, Teach For India, Chairperson of Thermax Limited

Today, the Teach For India Alumni community is **3400+ members strong**.

A community that understands the challenges and believes that all children can attain an excellent education.

*Note: rounded off to the nearest ten*
Studies conducted by Columbia University and Educational Initiatives, and Board exam results over the last 4 years indicate that our interventions have helped bridge learning gaps, allowing our Students to outperform their peers in government and affordable private schools.

Our Fellows have also worked tirelessly to provide not just academic but holistic opportunities to our Students in and beyond classrooms, focusing on the role of values, the importance of reflection and holding ourselves and others to high expectations. Our own sense of possibility has been pushed as some of our Students have gone on to attend prestigious institutions like the United World Colleges and IIT, have taken part in state-level sports and interned with leading organisations.

Simultaneously, our Fellows have grown as leaders as they’ve grappled with overwhelming challenges in the Fellowship. They’ve co-created ecosystems of support with parents, teachers and school administration, resulting in 95% of our partner Headmasters wanting to continue our partnership year on year.

And as our Fellows take stock of their journey, they’ve recognized that our work isn’t just restricted to 1,000 Fellows and 32,000 Students, but deeply ingrained in a collective of more than 200,000 individuals across 7 cities - Students, Fellows, parents, teachers, community members, corporates, NGO partners and more - bound by a shared vision of serving children.

While we’ve made progress, our most pressing challenges remain in providing a holistic education to all our children. We need to ensure that the Students still below grade-level proficiency in reading are caught up. Our Math interventions need to be strengthened, rapidly. We need to establish better systems of support for our Students post the 10th grade, along with broadening the scope of opportunities and strengthening our support in specific areas so that our Fellows may experience maximum growth and success.

In the next decade, this is the question we’re holding:

How can we ensure that all of our Students receive a 21st century holistic education that grows their leadership and prepares them for a rapidly evolving world?

In the next decade, this is the question we’re holding: How can we ensure that all of our Students receive a 21st century holistic education that grows their leadership and prepares them for a rapidly evolving world?

We have a program that has consistently proven to be better than the alternative for Students.

## Student Results

**Student Achievements**

- 96% of all Teach For India Students who appeared for the 10th grade exam passed overall. While 100% of Teach For India Students in Chennai and Hyderabad graduated due to Government mandate, 98% of Pune Students, 96% of Mumbai Students, and 94% of Delhi Students passed the exam.

- Our Students are going on to University, and a majority of Students who are selected for the prestigious Aysara Leadership Academy in Pune and the Rajkiya Pratibha Vikas Vidyala (RPVV) schools in Delhi come from our classrooms.

**CENTA Olympiad**

Of the Teach For India Fellows who participated in the 2019 CENTA Olympiad, 31 ranked in the National Top Ranks, 26 received Regional Ranks and 35 received Subject Ranks.

## Past Externally Validated Studies

**Columbia SIPA (2012-16)**

Key findings from a longitudinal study conducted over these 4 years:

- **English:** Teach For India Students grew 5 times as much as students in non-Teach For India classrooms.

- **Math:** Teach For India Students grew 2.5 times as much as students in non-Teach For India classrooms.

**Educational Initiatives (2016-17)**

Key Findings from an end-year assessment for grades 3, 5 and 7 in English and Mathematics:

- In higher grades (5 and 7), Teach For India Students performed significantly better than their counterparts in government and affordable private schools.

- Pune and Mumbai were at the higher end across multiple classes and subjects, indicating that the more mature a site and program, the higher the chances of its Students performing well over time.
In a survey conducted by Teach For All, students shared how Fellows positively contribute towards their holistic development.

77% Students shared that Fellows ensured they were understanding content in the classroom.

81% Students stated that Fellows held rigorous expectations from them.

78% Students reported that Fellows valued their ideas and inputs.

73% Students shared that Fellows were able to create an engaging learning environment.

In a survey conducted by Teach For All, students shared how Fellows positively contribute towards their holistic development.
Fellows feel connected to our movement and hold a strong sense of community.

Results from the National Fellow Engagement Survey indicate that our Fellows believe deeply in our vision and mission, are able to see their impact & achievement come alive and experience a strong sense of community.

- **99%** Fellows share a strong belief that they have a role to play in ensuring all children attain an excellent education.
- **95%** Fellows reported that they feel part of a larger movement that is working to ensure that all children in India attain an excellent education.
- **95%** Fellows find purpose and meaning in the work they do.
- **94%** Fellows reported that people at Teach For India collaborate effectively towards providing an excellent education for our Students.

In the latest Alumni survey, the Fellowship scored a Net Promoter Score of **39**, indicating that our Fellows have a very positive experience during the 2 years.

Alumni quote the vision and impact of the Fellowship as well as the associated learning curve as the top most reasons for recommending it to friends and colleagues.

Mahesh Medlari, 2014 Cohort, People & Culture, Openhouse

“The Fellowship and the time that I spent being a Teach For India Staff member made me realise the collective impact a group of brilliant, diverse and driven individuals working for a cause can have.”
Alumni quote the vision and impact of THE FELLOWSHIP as well as the associated learning curve as the top most reasons for recommending it to friends and colleagues.

Professor Julie Hennessy
Clinical Professor of Marketing, Kellogg School of Management

“Teach For India makes an enormous difference in the lives of children, but also in the lives of those volunteers who teach as a part of this program. Teach For India Alums exhibit a guiding sense of personal purpose, a practical approach to getting things done with the resources available, and willingness to take on huge challenges. These qualities make them visionary leaders in any organization that they join. Teach For India’s contributions in this way are immeasurable.”
**Teach For India Alumni Engagement Survey March 2020**

52% Alumni indicated that the Fellowship experience played a pivotal role in their decision to work in the sector.

**Jahnavi Reddy, 2015 Cohort, The News Minute**

“I would say it was one of my first experiences where I had to constantly think about how structural/systemic flaws affect people from oppressed castes and religions on a daily basis, through my Students and their parents.”

**Ashish Srivastava, 2009 Cohort, Shiksharth**

“After my Fellowship with Teach For India, my job took me to different rural and semi-rural locations in North India, which exposed me to the stark difference in support that marginalised communities receive in such locations. While cities see a large number of CSOs doing great work, just within 100 kms, one would notice vastly poorer human development indicators. This exposure to the spectrum of inequity and the urge to go back to classrooms led me to quit my job and go on an exploration journey across India. During that journey, I landed up in Dantewada, Bastar in Chhattisgarh and never went back.”
Our Alumni surveys tell us that:

Our Alumni believe. Almost 100% say that they understand the challenges, and in spite of the struggles, continue to believe that all children can attain an excellent education.

Our Alumni are committed. 77% of our Alumni are working in the social sector. Amongst the 23% spread across the private sector, academia and other fields, many remain connected to children.

Our Alumni have widespread reach as they are cumulatively reaching more than 33 million children - or 1 in 10 children in India - through their work across schools, communities, policy and various levels of the system.

Our Alumni are beginning to influence the system. Nearly 12%, almost 400 Alumni, have founded 150+ organisations or occupy senior leadership positions such as CEOs, CXOs and policymakers.

Our Alumni bring strengths that the sector needs. Employers tell us that Teach For India Alumni bring qualities that make them an asset to organisations and individuals that they serve.

However, the Alumni journey continues to be challenging. Entry barriers to numerous pathways like policy, curriculum design and assessments are high. Our knowledge of the larger system is limited. Our entrepreneurs need access to resources to strengthen and scale organisations. Our teachers and school leaders experience challenges deeply ingrained in our system. Our Alumni need ongoing support and professional development, but their needs also vary greatly across cohorts and Alumni pathways.

How can we build not only the knowledge and capabilities, but also the partnerships needed to accelerate and deepen our Alumni’s impact towards educational equity?

Founder & Chairman, Central Square Foundation
Ashish Dhawan

“Teach For India Alumni combine their understanding of education grassroots with a passion to impact things at a system level. Irrespective of whether they are setting up new organisations, working as school leaders or assisting the government in policy formulation, they keep teachers and students at the centre of their efforts. Also, education reform requires long-term commitment, and one’s efforts and network add-up over a period of time. I am glad that the majority of the Alumni stay back in the sector with a deep and long-lasting commitment to education reform.”

Founder, Director, India Leaders for Social Sector
Anu Prasad

“Teach For India is a powerful movement of empathetic, committed, passionate, leaders who are grounded in the realities of the lives of their communities. Being a part of Teach For India is character-forming, it seems like a rite of passage for those who wish to contribute or build a career in public service. We already see the impact of a decade of Teach For India in various organisations across the development sector and beyond. May this tribe increase.”

Founder, Educate Girls
Safeena Husain

“Teach for India Alumni demonstrate not only the technical skills but also a deep sense of empathy for the demographic we serve. Our experience with Teach for India Alumni has been nothing short of incredible. If you are an education-focused civil society or a research organization, I would unequivocally recommend Teach for India Alumni.”

Country Director, International Innovation Corps
Shriya Sethi

“The fact that all the Teach For India Alums have spent two rigorous years on the ground understanding the grass-root challenges of the education system instills in them a sense of purpose, passion and vision which is really crucial in the domain of policy and governance. They come in within immense sense of empathy which helps them to form strong relationships with stakeholders across the board and also lead multiple initiatives.”

IMPACT AT SCALE

33,000,000 KIDS

When we add up the number of children reached by Alumni across all levels from schools, community to policy and government systems, our Alumni are cumulatively reaching 33 million children.

IMPACT AT DEPTH

Our Alumni working closest to children in school systems and communities are reaching almost 1 million children.

~1000x

After the Fellowship, Alumni significantly multiply their impact. Our Alumni community today is reaching 1000-times the number of children we work with in the Fellowship.

In 2 years, Fellows support 32,000 children directly.
34% of our alumni work directly on the ground with children

THE HOPE
ALUMNI SPEAK: ‘OUR WHY’

Sneha Shetty, 2017 Cohort, Avasara Academy

“Knowing that I am a valuable adult in their lives, not as a role model, but at least as a mentor, guide or listener is important. Ask yourself: What are you ready to trade for the work you love doing?”

Jasmine Sachdev, 2013 Cohort, Shiv Nadar School, Aagaaz Theatre Trust

"Working with smaller systems can lead to big change. I love teaching 30 kids & seeing ripples through the larger system."

Aditya Krishnan, 2014 Cohort, Teach For India

“We need to deep-dive into why the status-quo is so - no one wants low quality teaching, but it happens. With patience, change is possible - I’ve seen it, and that has been the biggest reward.”

THE CHALLENGES

Only 7% of Alumni are currently teachers. Alumni face multiple barriers in working with school systems, especially those serving kids from economically weaker communities.
A 2015 Fellow in Pune, Tanvi Metre believes that the two years she spent in a classroom were enough to inspire her to continue to work in education after her Fellowship ended. “Objectively, none of this would have been possible without the Fellowship. Would I have thought of building a career in the ed-sector (forget actually doing it)? Would I have gotten the opportunity to contribute towards building a solid NGO? Would I have met the people who have inspired me to stick around? No.”

The biggest challenge that she has encountered in her work is her attempt to reach every single child. According to Tanvi, current core programmatic interventions work for only 80% of the students, making it difficult to include the remaining 20%. But what has kept Tanvi going are her colleagues who are a constant source of inspiration and in spite of the work being tough, have never let her feel alone.

“Thank you! Akele, humse na ho payega. Need the momentum of a community of people working towards a common mission.”

“It will not be easy, but it will be 200% worth it!”

“Show up and stay. We can collectively break the status quo for the most under-resourced children in our country.”

"I wanted to try to make a difference in places where there is highest need - and I saw that just 20-30-50 kms outside our cities."

Alumni Speak: ‘Our Why’

Ashish Srivastava, 2009 Cohort, Shiksharth

“I do it because of the need. It’s not about my aspirations. Bastar region is larger than Kerala - there is no one there other than us. We have to do this. Hum witness bhi hain, hum awaaz bhi hain - hopefully a time will come when people will see this. Once you make this commitment you have to stick it out - we have to stay as long as we can.”

Varun Sharma, 2016 Cohort, Ministry of Home Affairs

"Actual solutions are very aligned to the broad framework we learned at Teach For India - the permutations and combinations are helping me drive change across all the departments I work with - only the problems are different. I don't have 6 months to study the system, I just have to jump in & continuous learning is key."

The Challenges

While Alumni working in indirect pathways are able to reach kids at scale, many of their initiatives are unable to reach kids in the remote and rural parts of the country. Alumni surface the steep drop in support for children in India’s most vulnerable areas.
“We are not going to solve the education crisis without improving the number and quality of teachers and our teaching methods.” Ramya asserts that the education crisis needs our plans to be simple but differentiated. Thrilled that the NEP has emphasized basic literacy and numeracy, and made room for 21st century skills, she feels it is time for us to peg our goals and get creative about achieving them.

Her proudest moment in her journey so far has been bringing together various stakeholders in order to relay feedback from the last mile beneficiary to the decision makers. “I worked on a project called DIKSHA (an education technology stack), which started just as an idea and 18 months later had been adopted by the government. There were so many people, iterations, opinions and philosophies that had to come together for it.”

Currently working at Central Square Foundation, Ramya says that the biggest challenge for her has been learning radical prioritization. “The numbers in India are huge and our problems are complex but we need to start somewhere to ensure we get the maximum impact with the limited resources we have.”

But despite all the challenges, what has kept Ramya going is people. Whether it’s people who are making a pit stop in the social sector or someone who is starting from scratch, she says, people can surprise you with their wit, warmth and openness. “It is possible to work with an investor’s head, a teacher’s heart and a farmer’s hand.”

“Find ways to collaborate, and build off of each other’s work. Whatever you do, it matters. The work of our Alumni community in bringing about change is palpable.”

“Give in whatever way you can - no work is too big or too small to do, no amount too little or large.”

“It’s only crazy till you do it, after that, hold onto the craziness, there is a huge family to back you. There’s no stopping till there is free quality education for every child and that includes your own kid (That’s my yardstick!).”

Alumni Speak: ‘Our Why’

Jasmeet Walia, 2013 Cohort, Creatnet Education

“The desire to make an impact at scale brought me here. The numbers in our country haunt you. Trying to work towards both scale and depth pushed me to work more closely with the Delhi Government.”

Madhukar Banuri, 2009 Cohort, Leadership For Equity

"The aim of reaching millions of children who belong to the bottom of the pyramid, studying in government schools, has always been a huge motivator for me to work in the education space. We are all aware of the reasons educational inequity is widespread in India. I strongly believe that the only way to eradicate inequity in India is by working with or within the government. If we, as the influential generation, don't step in to do this, then who else will?"
“The biggest challenge in my work has been to align a multitude of stakeholders towards a common shared vision. I’ve often had to deal with conflicting, competing and different expectations and interests but what’s kept me going is pausing, and then bringing the focus back to the children we work with.”

Over the past seven years, Dhruv’s work with diverse stakeholders in the education sector has been bolstered by the on-ground experience he gained during the Fellowship. His knowledge of how policy translates into practice at a school-level along with his understanding of front-line workers has acted as a strong foundation for him.

Dhruv works in the education sector because he has experienced the value of a good teacher firsthand: a teacher once painstakingly rebuilt his confidence after he faced several adverse circumstances at school. Life came full-circle for Dhruv when his own Student attributed his confidence to the after-school conversations he had with Dhruv - a moment he considers his biggest success till date.

“All children are not the same and their needs differ. In a society as heterogeneous as ours, we need to look beyond the aggregate level data available to us on learning poverty. We need to study the intersection between social justice and education, and identify the most vulnerable groups of children including children living with disabilities, children belonging to minority groups, children displaced due to forced migrations, abuse and trafficking survivors and children living with chronic illness. Child protection, health, nutrition and education outcomes for these children are much worse than the national average we use for our baselines. We need to pay special attention and focus on these children.”

“The best way to create sustainable and inter-generational impact is to develop a strong partnership with parents and the larger community.”

“We don’t need convincing that investment in human capital development is an effective way to end extreme poverty, we don’t need convincing that education is an effective tool to transform our society, and we don’t need convincing that prioritizing children is better for both social and economic outcomes, what we need is effective and prioritized action.”

“We need to collectively celebrate our failures and achievements, communicate and collaborate with each other so that we aren’t reinventing the wheel.”
14% of Alumni are currently working in the private sector across diverse areas

2017 Cohort, Business Analyst, Egon Zehnder
14% of our Alumni are currently working in the private sector across diverse areas, yet many continue to stay connected to kids and the larger mission.
“Working across both the private and development sectors enables one to work with a diverse set of stakeholders and contribute to the larger ecosystem.”

Mayank Lodha, 2010 Cohort, KPMG India

“The Fellowship allowed me to adopt a systems view of thinking. I continued my journey in the private sector in a role that allowed me to work in the education and development space.”

Ankita Nayak, 2013 Cohort, JP Morgan and Chase

“Being able to look at things with a strategic lens and creating impact at scale, by working with multiple levels of the ecosystem is what motivated me to join the for-profit space”

Yash Kumar, 2009 Cohort, GenYMEDIATE

Teach For India Alumni in the private sector strive to balance two worlds. “There are several Alumni working in for-profit corporations, but they are more disconnected from Teach For India as compared to Alumni directly working in the sector. We would like to change that.”

Alumni Speak: ‘Our Why’
Charag's journey from teaching in a Pune Municipal School to becoming the first Teach For India Fellow being elected Partner at McKinsey & Company shows how malleable the Fellowship really is – preparing one with skills that can be leveraged in any field, even those perceived to be far removed from education. Currently, specializing in financial transformations for higher education institutions and the setup of workforce development programs, Charag helps universities overcome challenges by advising them on how to adapt to their rapidly changing external environments.

Having learnt the power of perseverance as a Teach For India Fellow, Charag says what keeps him going is knowing that behaviors and mindsets can be changed. Still in touch with several of his 52 kids, he recently caught up with them over Zoom and was filled in on the latest developments in their lives. Despite the number of accolades to his name, nothing makes Charag prouder than his Students being enrolled in college, changing the trajectory of their own lives. And it warms his heart to know that he played a tiny role in making that possible.

“Thank you for all your commitment and dedication during the Fellowship and in whatever way you’re a part of the mission now as well.”

“Even one person’s actions can make a huge difference.”

“There is an even bigger role for the corporate sector to play in education. Token CSR contributions are not enough to change the course of educational access and equity for all children.”

Funding continues to be a key challenge for social entrepreneurs. “Funding. It is the biggest constraint. The sword that is always hanging on the heads of most social entrepreneurs.”

Gaurav Singh, 2009 Cohort, 321 Education Foundation
“I found a problem I was passionate about and developed an approach that not many people were taking. I was too young at the time to understand how hard it would be but that is how my journey actually started.”

Ketaki Patil, 2016 Cohort, Ummeed
“I never thought that I would want to be an entrepreneur. It was an organic journey. Interaction with parents, especially mothers, during the Fellowship made me think of how a mother’s independence can make a difference to a child.”

Prasanna Sundaram, 2014 Cohort, Augmented Understanding
“I joined the Fellowship after 10 years as a strategy consultant. I understood data usage was a big gap in the sector and that’s how the idea for Augmented Understanding came up.”
Shreya Krishnan, an architect by training and a 2017 Fellow, founded The Better Design Foundation (BDF), a nonprofit design and innovation organisation. The Fellowship allowed her to develop a grassroots understanding of the education crisis and pushed her to try new things, which in turn deeply informed her work at BDF. Her proudest moments were “those when I saw my Students displaying leadership and when I was successful in reversing Student dropout rates.” Despite the inevitable obstacles that have stood in her way as a changemaker, the fuel that drives Shreya is the “ecosystem of support available to [her] through the incubators and peers in the sector.”

Shreya’s hope is that the Teach For India community will continue to address the barriers hampering educational equity, and grow to “make quality education accessible to more Students.”

OUR ALUMNI COMMUNITY

“Leverage the strength of Teach For India’s community and reach out when you need help because more likely than not, you are going to get it.”

THE STAKEHOLDERS

“Be more open to unconventional ideas - try something new even if you don’t fully believe in it - it might just surprise you with a positive outcome.”

OUR FUTURE FELLOWS

“Immerse yourselves in every experience – the companionship among Fellows, the ups and the downs of the classroom and every small bit of it – because there is nothing like it.”
“Over the years, I have had the opportunity to interact with at least 500 Teach For India Alumni, many of whom are now young social entrepreneurs running various education programmes across the country. Their passion, dedication, courage and leadership has left me wowed almost every single time. What Teach For India has done in the last decade to contribute to the leadership pool in India’s social development sector is probably unmatched and I would think, exceeds the contribution of many schools of social work and development as well.”

Venkat Krishnan N,
Principal Trustee,
India Welfare Trust

The Fellowship made a significant difference to the way that Kim thinks about their own involvement in spaces like education and development. It specifically got them interested in monitoring and evaluation, and in inclusive learning environments. Currently doing fieldwork for their PhD in Delhi, Kim is primarily focused on how disabled bodies are made legible to governments through quantification and identification, including the processes of being counted in the census and of obtaining a disability certificate or unique disability ID.

A 2011 Fellow, Kim states that being away from the classroom these past few years has been the biggest challenge they’ve faced. “I really enjoyed teaching during my Fellowship, and being able to stay connected with work in and around classrooms through a range of different sectors and lenses has kept me going.” At present, a PhD candidate in Education and Anthropology at the University of Pennsylvania, Kim states that it was the Fellowship that made them certain that they wanted to come back to the classroom to teach. “I am grateful for how crucial the Fellowship has been in introducing me to a range of issues that I have continued to be interested in and work on.”

Kimberly Fernandes
2011 Cohort, PhD Candidate, Education (Human Development) and Anthropology, University of Pennsylvania

Our Alumni Community
“We have an incredibly rich and connected Alumni network, and I hope that continues to feel like home long after your Fellowship is done!”

Kimberly’s Message To...

Our Future Fellows
“The Fellowship is a two-year journey that allows you and your Students to find adventure, make mistakes, and shape it the way you’d like -- I hope you enjoy it tremendously!”

The Families of Our Students
“Thank you for trusting us to care for your children - it is such an honor to have spent the time that we did/do with them!”
“The amazing thing about Teach For India Alumni is their imagination and realism. Their ground work in the classrooms and communities has given them a hard realistic look at the inequity and injustice children face and what it takes to create a shift. Their love, intelligence and tenacity let’s them imagine a more fair and luminous world as they dedicate their lives to creating the path for equity.”
The complex work across sectors today demands 21st century leadership.

1. **Ability to lead through more complexity and ambiguity**
2. **Ability to lead more quickly**
3. **Ability to lead through influence**

**Top 3 skills for 21st century leaders, according to a study by Deloitte:**

- **97%**
  - of leaders in Indian NGOs feel leadership is important.

- **53%**
  - of NGOs do not have confidence that someone could lead the organization in absence of their founder/leader.

- **50%**
  - of NGOs are unable to prioritise leadership development due to inability to secure funding for capacity building.

**Good Leadership is critical in the social sector:**

Research by Bridgespan indicates a critical leadership gap in India's social sector.
Before the Fellowship, the likelihood of potential Fellows joining the social sector is low.

During Fellowship
The Fellowship transforms their mindsets and career paths.

After Fellowship
At the end of the Fellowship, Fellows show a higher likelihood of working in the education sector.

- 55% more likely to be working in the field of education
- 50% more likely to hold a job that focuses on addressing a social cause
- 32% more likely to be engaged in an activity related to serving low-income communities
- 26% more likely to work in a socially-inclined service-oriented sector
- 38% less likely to work in the private, for-profit sector

An independent study indicates that the two year fellowship has a significant impact on Teach For India alumni’s future career choices.

“The Impact of Teach For India on Participant Career Pathways and Aspirations” (2015)
Katherine Conn
Teacher’s College at Columbia University
and
Cecilia Mo
University of California, Berkeley
To put our children on a life-changing path, we need various puzzle pieces to come together. From early childhood education and parental support, to safe spaces in schools, holistic teaching, assessments and curriculum, sound governance and policies- all of these play an equal and necessary part. Establishing and executing systems that will fulfill these multiple needs, is perhaps, our most important role as educators. We have learned that aggregating these pieces is daunting, complex and often slow, but if we hope to reach ALL children, this needs to be done.

Looking at the story of what Delhi has been able to achieve over the last 9 years fills us with hope that we might just be on the cusp of change. Currently, our 260 Fellows and 800+ Alumni impact 4.4 million children in the city. Fellows across Delhi have set up community centers to facilitate additional learning time and have introduced projects and Student-run community interventions to foster peer learning. Additionally, 30+ organisations have been founded by Teach For India Alumni in Delhi, filling numerous gaps in the system from early childhood education to parent empowerment. Moreover, 1000+ Student leaders are driving change. Jyoti Singh Chauhan, a Teach For India Student in Delhi started project Gurukul, where she invites other Students to conduct workshops in art and spoken word poetry with the aim of building respect for the arts and artists in our communities.

If our community continues to fuel collaboration and partnership towards driving change, the way they have been, in the coming decade we could shift education and life outcomes for children in Delhi, one block at a time, and make considerable headway in our goal of ‘One Day All Children’.

And while we endeavour to do this, we root ourselves in answering one question-

How must we work together across communities, districts and regions – across lines of difference – to multiply our impact so that all of India’s children receive an excellent education?
“In my capacity as Secretary, School Education and Literacy, Government of India I had the occasion to interact with those associated with Teach For India. I was impressed with their professionalism and commitment in attempting to bring about a positive change in school education.”

Anil Swarup
Former Secretary, School Education and Literacy, Government of India

“Over the years I have seen the Teach For India community grow stronger as their influence and impact has grown beyond Teach For India programs and schools: to social enterprises, government initiatives and other fellowship programs. However, even in this diversity their passion and commitment to empower education for all has always been a guiding force.”

Prachi Windlass,
Director,
Michael and Susan Dell Foundation
Can we learn from – and spread – innovations rapidly so we serve not some, but all children?

Given the vastness of the education crisis, we started recognizing the need of amplifying our community’s learning and innovations as greatly as we can into the system.

Through TFix we began incubating entrepreneurs who would adopt the Fellowship model to launch contextualised programs across high-need, sub-urban and rural regions in India. 19 Fellowships with 382 Fellows are currently being run across Bihar, Assam, Kashmir and more reaching 30,000+ children.

Through Firki, our online teacher training portal we started creating a world class, open source, blended learning program for teachers, more than 97,000 of whom across India are leveraging 200 courses in English, Hindi, Tamil, Telugu, Kannada and Marathi to deepen and transform their teaching methods.

The Kids Education Revolution (KER) started taking shape as a bold and ambitious collective of schools and educational organisations working to reimagine education at scale. Today, KER is driven by a profound belief in student voice, student leadership and in students and educators being partners. The essence of KER lies in the sentiment that education cannot continue to be something that happens to our kids - but needs to happen with our kids, and for our kids. This seemingly simple, yet incredibly potent idea has already reached close to 40,000 student revolutionaries and educators.

Over the last 4 years, the early seeds of these ideas have been cultivated by our collective community.

The pandemic has highlighted, in ways like never before, the gross inequities our children continue to face. In the coming decade, perhaps one of the most important questions we must continue asking ourselves is:

*How do we continue innovating – and begin democratizing education – so we discover better and faster ways to improve the lives of India’s children?*
“When I think of KER, I sense a hope that a safe space for us Students to grow is possible, where we get recognition and a voice. In the next few years, I hope to see KER working in partnership with the government more, where we help the government design events, so that they realise the importance of bringing kids into the system.”

Raghavendra Yadav, Student Alumnus

“Firki has been a great partner on our journey as we move closer to putting ‘a book in every child’s hand’. Through our association with Firki, we hope to equip teachers with resources that help build joyful and engaged classrooms.”

Vineetha Menon, Pratham Books

“The TFIx journey brought alive the power of the collective. The experience has been one of the most profound experiences both with regards to personal growth and as a changemaker in the space of education. Above all, it provided everyone with a safe space to share, listen and grow!”

Sajida Vadgama, Ummeed Child Development Center
INTO THE NEXT DECADE

The 2009 - 2021 Impact Report offers a peek into our journey over the last 12 years and our first 10 cohorts. Take a minute to pause, to celebrate what our community is capable of, and to hold the truth and the hope of our collective journey ahead.

The impact of our first decade was embedded in our attempt to answer those original five questions - attempts which have given rise to more complex questions. Questions, which we should work in service of answering over this next decade.

What will it take to not only bring in more Fellows but also more diversity, more drive and an even higher set of capabilities to further fuel our shared mission in the coming decade?

How can we build the capabilities, bridge the knowledge gaps and strengthen the partnerships needed to accelerate and deepen our Alumni’s impact in the movement towards educational equity?

How can we attempt to democratise education, and figure out better and faster ways to reach all children across India?

How can we more consistently and effectively build leadership in students and Fellows for the post-pandemic world, rooted deeply in holistic education and ‘21st-century skills’?

How must we work together across communities, districts or regions to bring together various ingredients our children need to attain an excellent education?
In the poem that follows, Muskaan opens a window to the truth for most children today. She says:

dressing up for school feels like going for a war that I never want to fight all I saw in the classroom was catcalling, rude comments and arguments I am taught to break myself and destroy everything other than that performance graph

This incredible, talented, bright-eyed, insightful child writes: I am a part of those children who don’t matter My identity is that of an average child

Read between the lines, as I did. Read Muskaan's poem again and again and again. Do you see part of your school experience in hers? Can you feel her plea? Can you hear her say:

Teach us: to calculate, but to calculate goodness to learn languages, but to write poetry to speak, but to recite my feelings to believe, so that my classroom becomes a home of changemakers

Show me that the world can be magic.

As we march ahead, more than the knowledge that we are touching millions of lives, let’s keep asking ourselves:

How deeply are we touching them? What do they need? Are we equipping them for a life dotted with moments of magic? Who do we need to be to serve?

As we march ahead, let’s remember the profound power of an excellent education. It’s ability to deepen our awareness of self. To shift the way we respect, and value, and interact with others in the world. To equip us to solve, and create, in service of a better world.

Finally, here’s a closing note about dots. They are as tiny as the tip of a pencil and as large as the universe. They are complete as a raindrop and can merge together to create powerful water bodies. Perhaps that is my hope. That each of us is our most authentic self. But that we come together, with acceptance, belief and love, to address all the boulders that will inevitably come our way on the long road to equity.
DEAR AMMI,

Funny how in the morning the alarm doesn’t wake me up, your voice calling my name does. But each and every day dressing up for school feels like going for a war that I never want to fight, becoming a soldier that I never want to be, a uniform that I never want to see myself in.

But what if I tell you that the journey is harder than just dressing up, What if I tell you that at school, I am called an average kid? What if I tell you understanding what it means led me to step into a puddle of misperceptions.

Even after putting my nose to the grindstone, I saw my academic performance graph looking like the shape of a mountain.

Understanding what it means led to me questioning my existence
My achievements
My hard work
Me and my identity
And greeting my abilities with multiple question marks

What if I tell you that it made me question the times I aspired fearlessly
The times believed in my ambitions
When I could proudly recite my feelings in front of a thousand people
When all I saw in the classroom was catcalling, rude comments and arguments and I believed that one day I will hear them reciting poems and giving shout outs to each other?
What if I tell you that it made me question the times I believed that my classroom could become a home of changemakers and not bullies?
What if I tell you it felt like walking barefoot in the middle of a desert and finding a way home, a home that was never built?
Questioning the times I failed but still did not stop believing

You know, broken dreams hit us hard, really hard. It exactly feels like how you felt on the day when you got married right before the day of your biggest dance performance. It feels like spilling water on a canvas that you have been painting since months And in my case, since years My canvas looks all messed up Your canvas looks messed up
What if I tell you it feels like I am broken into multiple fragments
And this word destroyed all of them
And only left the mountain shaped graph
What if I tell you that at school they teach me calculation?
I am taught to calculate goodness with percentage, grades and numbers
At school, they teach me languages
But not to write a poem in those languages
At school I am taught to break myself and destroy everything other than that performance graph
What if I tell you at school I am greeted with thousands of question marks?

At school, my identity is limited to an average kid
Being a part of those children who never really matter
Whose existence is no more important than the blackboard, the chalk and the desks in a classroom?

At school we believe that a person who schools you is the person who educates you
The person who schools you is called a teacher.
And I am called an average kid

I am sorry, this system wasted all your efforts, broke you into pieces just like me
I am sorry to tell you that this world holds no magic
But I know I will always see your eyes sparkling the most in the audience
And I know that is where miracles happen

Alumni Engagement Survey, March 2020:
In our efforts to get feedback from our Alumni community, we designed an engagement survey this year. The objective of the survey is to gauge the effectiveness of the spaces and initiatives created for the community as well as to understand the level of engagement of the community with the cause of education, Teach For India, and the broader Teach For All network. We completed the survey, with a final response rate of 47%.

Alumni Impact Short Term Study, November 2019:
As an internal initiative to assess the impact of our Alumni in an objective manner, the Strategy & Learning and the Alumni team conducted a randomized study with ~200 Teach For India Alumni. Considering a 7% margin of error, a 95% confidence level, and a response rate of 50%, an initial sample of 400 Alumni was created for the study. We ended up interviewing 188 Alumni via one-on-one telephonic/video interviews to know more about their current professional status, ways in which they are engaged in the education or development sector, and their learnings from the Fellowship.

10th Grade Board Results (2020) reported are based on 96% of our Students, for whom we have data available. This may change slightly once we receive data for all our Students.

CENTA (Centre for Teacher Accreditation) conducts a Teaching Professionals’ Olympiad every year. In 2019, 79 Fellows from Teach For India participated in the Olympiad across 12 Test Tracks.

Educational Initiatives, an organization working in the field of educational assessments, conducted benchmarking assessments for our students of Grades 3, 5 and 7 across all our 7 cities in 2017.

The Four Year Longitudinal Study, conducted in partnership with Columbia University (2012-16), was executed by practitioners from Columbia University’s School of International and Public Affairs. The study aimed to measure the growth of Teach For India’s students in literacy and mathematics over time.

The Teach For All Student Survey is conducted annually by Teach For All, and gathers feedback about their classroom experience across 19 key areas. In 2018, the survey gathered responses from 517 Secondary and Upper Primary Students taught by 15 Fellows (2017 and 2018 cohorts). The responses included here are from Secondary Students.

National Fellow Engagement Survey (FES) is one of the most important tools we have to collect feedback from Fellows on the Fellowship program. Data reported is taken from the mid-year FES for 2020-21.

Deloitte Global Human Capital Trends Survey, 2019, can be accessed at this link. Note: Only respondents who believed that 21st century leaders faced new and unique requirements answered this question.
“Building the Bench at Indian NGOs”, 2017, is a report by The Bridgespan Group that looks at the root causes of the leadership development gap in India and highlights replicable approaches NGOs and funders can take to bridge it. (Page 38)

“The Impact of Teach For India on Participant Career Pathways and Aspirations” by Katherine Conn, Teachers College at Columbia University and Cecilia Mo, University of California, Berkeley: As a part of the ‘Global Equity within Reach’ multi-country impact evaluation study by Teach For All, researchers Katherine Conn, (Teachers College, Columbia University) and Cecilia Mo (University of California, Berkeley) investigated the impact of Teach For India on the career trajectories, mindsets, and policy preferences of Alumni. The impact evaluation study used a regression-adjusted model to form a comparison group of non-participants. The study targeted applicants from 2009-2014 cohorts; the final sample size was approximately 3,185. (Page 39)

The testimonials from industry experts were gathered in May 2020. (Data used in multiple pages)

WHAT HAS ENABLED CHANGE

Relationships and Collaboration

The relationships that we have built with our Students, their parents, our school leaders, our community members, and between Fellows and staff of Teach For India have been instrumental in almost everything that we have achieved. Culture of collaboration is the bedrock of all the success we have achieved in the region.

Keeping children at the center

In every decision we take and every plan we make, we have kept our children at the center. It has been our north star in deciding strategy and priority. Building partnership with our Students to ensure that their voices are taken into consideration when decisions impacting them are taken.

Samait Shala was started by Kushal Dattani who is a 2014 Ahmedabad Fellow. The organisation trains teachers directly to ensure that classrooms are inclusive of Students who learn in different ways and at different paces.

Our Alumni Irfan Lalani teaches coding to Students from our schools as it is a 21st century skill that our schools do not cover.

Project We Can works on spreading awareness around gender inequality and gender stereotyping with mothers of Students.
Increasing local opportunities
We want to create opportunities for our Fellows to stay back after they finish their Fellowship in the region. We want to do this by promoting entrepreneurship amongst our Fellows and also partner with external organizations for opportunities.

Wrap around support for Students
The pandemic has shown us that our Students need support not just in education related matters but in other areas as well. We want to build support for health and finance for each Student so that they are able to go to the college of their choice.

Scaling our direct impact
We want to work with more schools in the communities we work in so that we can impact the entire community.

2021
A culture of innovation and collaboration

A culture of innovation sits at the heart of the progress we are seeing in Bengaluru. Alumni, Fellows, Staff and partners are leveraging the ripe ecosystem of entrepreneurship in the region to accelerate impact and solve contextual challenges. Teach For India Alumni now lead 7 education enterprises ranging from teacher training, career readiness, early childhood to ed-tech. Platforms like Karnataka Learning Partnership, EkStep and Shikshalokam are fueling collaboration across these various initiatives.

Proof points of strong Student outcomes

Our children are increasingly becoming the leaders we wish to see and are taking up projects that solve for contextual challenges. In the last 3 years, we have gone from 6 sustained Student projects to 23. 24 Student partners have worked with their teacher partners through the year to strengthen their classrooms. We have leveraged multiple partnerships for holistic learning for our children like Reap Benefit, InquiLab, Goldman Sachs MUN, Apple Tech Project.

An Alumni network growing in influence

Teach For India’s Alumni network has grown from 150 to 420 in the past 5 years. Our Alumni are now coming together to partner with government bodies, leading organizations ranging from early childhood and career, and to building capacity and teacher training as well as ed-tech platforms. We are now piloting a shared regional pilot with Alumni and other organisations to work towards a common goal in a focused geography.
In 2017, Bhargavi Somshekhar started her project to end gender discrimination in her classroom and community. Today, Bhargavi is working to mobilize children from across the city to come together, express their experience with our education system in a theater format and mobilize change through the power of their expression.

Teach For India has partnered with Mr Narayana Murthy and Government of Karnataka to support teacher training of all state Government teachers through Teach For India’s FIRKI teacher training platform.

Swetha founded Key Education Foundation to train teachers on early childhood interventions.

Shekar founded Shifting Orbits and runs after-school centers to enable career/college readiness for kids from Grades 9 to college.

Santosh founded Mantra4Change to build capacity in government stakeholders.
1. **Build regional pride**

We will focus on building love for Bengaluru by focusing on making progress visible, sustaining and accelerating momentum, mobilizing people and resources and creating early proof points of impact.

2. **Focus on schools, classrooms and government capacity**

We will strategically place Alumni closer to the ground, in roles working directly with kids in schools and classrooms, and across the government machinery to build capacity in decision makers.

3. **Aggregate impact in a focused geography**

Work directly with education sector players, corporates and government stakeholders towards a shared vision of 90% 10th pass rate and reducing dropouts by 50% by 2030. 7 organizations have come together for this initiative led by Teach For India.

...By 2023

WHAT HAS ENABLED CHANGE

Diversity

The Chennai region today is 300 Alumni strong who have chosen diverse pathways post the Fellowship. Ranging from teachers to teacher trainers, curriculum developers to ed-tech entrepreneurs, NGO representatives to working in government, the diversity of our Alumni is immense. They work in rural, urban and tribal regions, spread across 13 districts in the state of Tamil Nadu and bring in perspectives, opinions and voices from many walks of life, enabling us to understand not just educational inequity, but inequity in all aspects of life.

Early stages of Public-Private Partnerships

Tamil Nadu has always had a high number of NGOs but the scope of NGOs and government departments working together in a long-term partnership, in the education landscape, has been limited. The last 4-5 years has seen a shift with a significant number of opportunities for civil society to explore long-term partnerships. Today, we have NGOs, private companies, individuals, almost all of which have our Alumni leading change at scale. Public-private partnerships, though in the early stages has enabled opportunities for our Alumni to explore impact at scale.

Social Entrepreneurship

In the past 4-5 years, we have seen 7 Alumni organisations take birth in the region. Chennai and Tamil Nadu have a vibrant and unique social entrepreneurship ecosystem that in recent years has grown leaps and bounds. The number of social enterprises in the region is increasing year-on-year, which enables us to take our impact beyond Chennai to other districts in Tamil Nadu and create more opportunities for our Alumni in education and beyond.
Madhi Foundation was started in 2015, working with 15 Corporation Schools in Chennai. Started by a staff alumnus of Teach For India, Merlia Shaukath, today Madhi Foundation is one of the most prominent NGOs that is a trusted partner of the state government of Tamil Nadu, working towards improving Foundation Literacy and Numeracy. Today Madhi has 6 Teach For India Alumni in their core team.

Srini Swaminathan, a 2010 Alumnus and our former Chennai City Director couldn’t stay idle when migrant workers started going back to their hometowns by foot. He started distributing food packets and was able to serve 135,000 labourers. His efforts were recently recognised globally when the United Nations in India and NITI Aayog launched #BharatKeMahaveer which celebrates Indians who have shown extraordinary kindness at the wake of COVID-19.

Shivanjani, an Alumni from the 2016 cohort is passionate about working with women in rural India. Currently, she is an entrepreneur at Kanavu in rural Tamil Nadu, with a women’s collective.

Sethuraman, an Alumnus from the cohort of 2014, founded Jungroo Learning, which explores the role of Artificial Intelligence in the way children learn and are assessed.
1. Encouraging Social Entrepreneurship
We hope to encourage social entrepreneurs in the region who will be able to compliment our collective efforts and in turn, create opportunities for more people to participate in the long term movement in the education landscape of the Tamil Nadu region.

2. Autonomy, Accountability & Grasstop coalition for the region
We hope to create pathways for Alumni to be instruments of change in our multiple school ecosystems. We hope to immerse Alumni in the various facets of inequities, leveraging the community towards social activism.

Delhi

WHAT HAS ENABLED CHANGE

A culture of ownership & collaboration

Teach For India Delhi staff and Alumni have operated with a lens of high ownership and deep collaboration. The results are evident not only in the number of BTCPs, Community centers, Staff, Fellow and Student-run initiatives in the Fellowship, but also in the number of Alumni entrepreneurial ventures, strategic partnerships and overall connectedness of the Teach For India community in Delhi.

An Alumni network growing in size & influence

700+ Delhi Alumni span a diverse set of puzzle pieces from teaching and teacher training in schools, community-level initiatives, policy, governance and state-level reforms to health, sanitation, nutrition and the private sector. Moreover, as more Alumni are starting to occupy positions of influence - as CEOs, Founders and heads of government bodies, they’re starting to impact 4.4 million Delhi children through various programs and initiatives.

Deepening partnership with the Government

The state government’s focus on spending 26% of its budget on education has been a huge opportunity for the region. The recent involvement of both Teach For India, as well as Teach For India Alumni in projects spanning the model school development, mentor teacher training, democracy curriculum, child protection and more is a proof point of how the Teach For India Delhi community is becoming a partner in changing the face of education in Delhi.
DELHI GOVT. & MERAKI, LED BY ALUM SEEMANT DADWAL, join hands to enable parental support for kids education during Covid-19.

WHAT HAS ENABLED CHANGE

Invested Government Institutions

The last few years have seen a significant shift in the way government institutions such as the SCERT, Samagra Siksha, Directorate of School Education, and the Telangana Social Welfare Institutions are steering change in the region. There has been an increased emphasis on improving learning outcomes and foundational literacy and numeracy in the region. Government institutions are open to exploring a range of public-private partnerships.

Alumni Collaboratives

We have witnessed multiple collaboratives come alive since the inception of Teach For India. Be it the diverse range of Institutions like Alokita, Catalyst and 321, started/led by Alumni entrepreneurs, or be it the diverse set of Alumni collaboratives such as Prayas, Bharat Dekho and others conceptualised to mobilise the Alumni collective, we have witnessed multiple initiatives that have led to a meaningful shift in the region.

Growth of service-based Educational Institutions

The last decade has also witnessed mass migration of Students from state-run government schools to low-income private schools. This led to a huge demand for affordable high quality teaching-learning resources, school leadership training, teacher training, among various other areas. The region has seen organisations like Learning Curve, LEAD, 321 Education, Godrej Foundation, among others, that are working directly with the BPS segment in steering key service delivery to these schools.
J-PAL, Haqdarshak and Indus Action have played a pivotal role in steering key changes in policy and governance in the state of Telangana.

TSWREIS, Inqui-Lab Foundation and Teach For India came together to conceptualize the Freedom Schools, a chain of innovative democratic government schools set up by TSWREIS under the leadership of Dr. Praveen Kumar, IPS, one of Teach For India’s many regional champions.
Inculcate a love for Hyderabad:
Through a culture of collaboration, ownership and excellence, we hope to nurture a love for the city across our Fellows, Students, and the Alumni community.

1. Design Learning and Innovation Lab:
Through our learning and innovation lab, we hope to carefully study and identify the work of our Fellows and Alumni, and amplify their innovations in the region to increase our influence to a wider audience.

TEACH FOR INDIA MUMBAI’S GROWING

COLLABORATION WITH MCGM
Teach For India’s partnership with the government has evolved over the years from being mere service providers to them reaching out to us for advice and collaborating on projects like training MCGM staff, Student Advisory council, best practice sharing.

TEACH FOR INDIA MUMBAI’S FIRST BATCH OF STUDENTS GRADUATE FROM 10TH GRADE
Our Grade 10 SSC pass % was 93% in 2016-17, 94% in 2017-18 and 23% higher than the MCGM average in 2018-19 and 96% in 2019-20. Over the next four years, nearly 3000 Students will have graduated from Teach For India Mumbai and a significant percentage will be enrolled in colleges across the city and elsewhere.

BUILDING ALUMNI MOVEMENT
The city has been steadily growing its Alumni network from 43 Alumni in 2011 to 280 in 2015. 321, Mumbai’s first Alumni led organization is already establishing its impact. For the first time, we have about 80 odd Alumni in one room talking about Teach For India’s phase 3.

BRIDGING THE READING GAP
60% of our Grade 4 Students in Mumbai will bridge the reading gap to grade by the end of this academic year. According to the longitudinal study in partnership with Columbia University, classrooms in Mumbai with Teach For India intervention showed 3-4X growth as compared to non-Teach For India classrooms.

What has enabled change

Our Fellows know what it means to set their Students on a transformational and holistic life path and have been recognized by CENTA TPO for their outstanding contribution to their classrooms. Some choose to continue teaching for 2-4 years beyond their Fellowship. Our Fellows have expanded their impact beyond their classrooms towards transforming outcomes for their schools through projects, persisting through challenges and creating proof points of what is possible in our highest needs classrooms and communities.

Alumni strengthening the school ecosystem

Students in Mumbai classrooms are growing in their values, exposure and awareness with the presence of Alumni-led opportunities like Right Pitch, Just For Kicks, Saturday Art Class, Claylabs, OnTrack, Udaan, Ummeed and others. Whether it’s extra-curricular activities, inclusive support, career guidance or value-based education, our Alumni are present in every level of the schooling system and are filling the academic and holistic growth gap.

Fellows rooted in the needs of children

Our Fellows know what it means to set their Students on a transformational and holistic life path and have been recognized by CENTA TPO for their outstanding contribution to their classrooms. Some choose to continue teaching for 2-4 years beyond their Fellowship. Our Fellows have expanded their impact beyond their classrooms towards transforming outcomes for their schools through projects, persisting through challenges and creating proof points of what is possible in our highest needs classrooms and communities.

A rich ecosystem of organizations

Mumbai has a great ecosystem of organizations operating in different parts of the education sector. Many Alumni have joined these organizations in various roles. For example, Aseema, Akanksha and Muktangan have created proof points of an excellent schooling system. Ummeed, Seeds of Awareness, Sols Arc and Jai Vakeel strive for inclusive and remedial education. Praja, Dasra, Project Mumbai and Haqdarshak are examples of organizations working as a bridge between government and citizens.
1. **Funding ecosystem for Alumni-led organizations and Alumni as teachers**
   We will look to unlock the value of the private sector to create a funding pool for Alumni ventures.

2. **Collaboration with State and MCGM towards strengthening the system**
   We will work on collaborative projects with the government, and look to open up opportunities for Alumni to work in key positions within the government ecosystem as a strong collective movement.

3. **School as a unit of change will be our biggest priority.**
   We will get more Alumni to operate schools, work as school leaders or find other models to excellent schools in the city.

PUNE
What has enabled change

Pune

A growing network of Alumni in the region

81% of the Alumni in the region continue to work in the education sector. From teacher training to child safety, technology to school leadership, our Alumni in the region continue to impact more than 1 million Students, 40,000 teachers and 800 government officials. Many Alumni led organizations have also created jobs for our graduating cohorts across various projects and roles.

Culture of Innovation and Problem Solving

Over the years, the Pune team has fostered a culture of problem solving and innovation amongst the Fellows. The city has seen legacy projects run completely by Fellows - like Show Us The Talent (Shoutt) and Model United Nations (Teach For India MUN) which continue to grow in size and impact. A large number of BTCPs have established themselves as long-standing projects and some, eventually organisations, like Life Lab, Pijam, TAP providing crucial value added services to our schools.

Strong Network of Advocates

Since 2014 the Pune Advisory Board has, through their relationships and influence, enabled us to form long lasting financial partnerships in the city, in addition to guiding our strategic work. The Pune Alumni Chapter, which comprises of Alumni across organizations, helps create spaces that enable collaboration within the Alumni community, thereby catalysing the work in the region.
A powerful network of schools like iTeach, Akanksha and Avsara Schools have allowed for our Students to access excellent education and fill a major gap in the city. 13 of these Pune schools are led by Teach For India Alumni and have played a pivotal role in steering key changes in policy and governance in the state of Maharashtra.

Over the last few years, through multiple efforts of developing Student leadership, we have been able to develop a partnership between Students and Fellows in creating a safe space for Students and empowering them towards a path of extended opportunities like KER Revolutionaries (50 Students from Pune), Maya and the Greatest Show on Earth.

INNOVATED and TFIx have enabled Alumni led organizations - Pune Children's Zone, The Apprentice Project and PiJam Foundation to impact over 3000 children and over 100 families.
A child’s holistic development is not limited to a ‘school’ and there is an urgent need for a strong ecosystem of support and partnership with parents and communities.

1. **Teaching**
   Teaching has a direct impact on children and therefore, a shift in teaching habits will help facilitate achievement amongst children in the classroom.

2. **Teacher Training**
   Deep, sustainable change in a classroom is possible only when we strengthen the teachers in the system both by empowering existing teachers and by pumping strong teachers in the system.

3. **Community Engagement**
   A child’s holistic development is not limited to a ‘school’ and there is an urgent need for a strong ecosystem of support and partnership with parents and communities.

---

For the next 3 years, our city’s vision is to build strong leaders at the school and community level towards holistic development of children. To achieve this, we will be working on:

---
